# A Novel Net that Learns Sequential Decision Process

**Authors:**

Guo-Zheng Sun, Yee-Chun Lee, Hsing-Hen Chen

**Abstract:**

We propose a new scheme to construct neural networks to classify pat(cid:173) terns. The new scheme has several novel features

: We focus attention on the important attributes of patterns in ranking order. Extract the most important ones first and

the less important ones later. In training we use the information as a measure instead of the error
